SESSION 2: DIGITAL TRANSFORMATION: HOW DO WE SHAPE ITS SOCIAL AND LABOR IMPACTS?

MAHENDRANATH BUSGOPAUL
COORDINATOR, MAURITIUS INTERNET GOVERNANCE FORUM
DIGITAL TRANSFORMATION:

HOW DO WE SHAPE ITS SOCIAL AND LABOUR IMPACTS? THE EXPERIENCE FROM MAURITIUS

MAHEN BUSGOPAUL
DEVELOPMENT IS ANIMPORTANT PART OF HUMAN EXISTENCE

To be richer, more efficient, Faster and bigger. Its all about Becoming better
GREAT BRITAIN RECORDED THE FIRST INDUSTRIAL REVOLUTION

The third revolution was and is still being driven by the invention of the internet; a form of technology that has become greatly ubiquitous.
TECHNOLOGY HAS BECOME A SIGNIFICANT FACTOR THAT DETERMINES DEVELOPMENT

Digital transformation is a global wave that has most likely come to stay.
THERE IS LITTLE LEFT BETWEEN DIGITAL AND PHYSICAL COMMUNITIES

Our societies are more immersed in the power of technology
THE MAURITIAN SOCIETY IS NOT LEFT OUT

With the influence of SMAC-IoT technologies, the Mauritian society is feeling the impacts of digital transformation
THERE IS A CONSTANT MIGRATION OF CITIZENS ACROSS THE COUNTRY

Turns out their destination is online; an arena of mobile communities and digitally sustained relationships
MOBILE IS THE DOORWAY TO LIMITLESS CONNECTIONS

A portal that unlock arenas of aggressive marketing strategies, mobile offices and efficient task execution tools.

The African Internet Governance Forum - AfIGF2017
04 – 06 December 2017
DATA IS A KEY FACTOR IN UNDERSTANDING MARKET DYNAMICS AND DEMOGRAPHICS

Analytics tell more than we would ever want to share as individuals or communities
CLOUD MEANS NO BOUNDARIES, DOWNTIME OR COMPLETE SUBJECTION TO DEFINED TERRITORIAL RULES

As cloud computing reduces data storage costs, concerns still rises relating to jurisdiction and data control.
DIGITAL TRANSFORMATION CONTRIBUTES TO SOCIETY AS IT ALSO POSES SOME THREATS

A balance is of great importance
PRIVACY, SECURITY AND VIOLATION OF HUMAN RIGHTS THROUGH TECHNOLOGY IS A GREAT CONCERN
EFFECTIVE COLLABORATION BETWEEN PUBLIC AND PRIVATE ENTITIES IS NEEDED

A partnership that aims to fully harness the benefits of technology while maintaining civil and professional decorum
THE LAW: good technological knowhow is quite alien to most legal practitioners and law makers

Systems should be set in place to incorporate professionals into the legal framework in a bid to restructure the way the law deals with technology
ETHICS: is an important aspect of human existence and as such should not be left out

Ethical codes of conducts should be guiding principles in the implementation and use of technology in various business communities.
PROFESSIONAL BODIES NEED TO RISE TO THE CHALLENGE

With bodies such as the British Computer Society and Internet Child Safety Foundation (ICSF) amongst others, key stakeholders and contributors can align strategies with global professional guidelines and measures to see to a safe and productive digital transformation drive.
Canvassing effective education of parents on ‘Good digital parenting’ Halley Movement focuses on building communities that are aware of the transformations that come with digitization and best ways through which they can adapt.
PRACTICAL STEPS BY HALLEY MOVEMENT TO ADDRESS THE LABOUR SECTOR

Halley Movement is promoting the need for entrepreneurship in young Mauritians. This will lead to well structured start-ups that address the Mauritian pain points while creating economic value.
EVERYONE IS INFLUENCED IN ONE WAY OR THE OTHER BY TECHNOLOGY

It is thus very necessary that measures are taken by all concerned to make this transition more beneficial than threatening to society. It begins with everyone.
THANK YOU
